QUBITX'S QUX TOKEN

QUX Token is the digital currency of the QubitX project, designed to operate within the framework of a new and advanced quantum blockchain ecosystem. With a total issuance of 300 trillion QUX, this token was developed with the aim of promoting the development of the quantum blockchain community and ecosystem through two main stages:

1. ****Phase 1 (2024-2029)**:** During this period, QUX operates on the Binance Smart Chain (BSC) and Ethereum platforms, aiming to optimize flexibility and enhance liquidity .
2. ****Phase 2 (From 2030)**:** QUX moves to operate on Quchain, a quantum blockchain designed to expand the capabilities and security of tokens.

QUX Token is not only a means of payment in the QubitX ecosystem but also an important tool to spread knowledge and quantum thinking, to build the world's first hyper-connected economy. With a clear and sustainable development plan, QUX Token promises to become an indispensable part in the future of blockchain technology and quantum thinking.
